

Unguided Missiles How America Buys Its Weapons

By Fen Olser Hampson

W. W. Norton & Company. Paperback. Condition: New. 384 pages. Dimensions: 8.3in. x 5.4in. x 1.1in. A very useful book . . . Written for the general reader, it brings into clear relief the complex relationship between weapons procurement and the forces of technology, service parochialism, the arms race, military strategy and arms control. More significantly, it reveals that weapons acquisition depends as much on political compromise as on superpower parity, military doctrine or even plain logic. Publishers Weekly The B-1 bomber the cruise missile the Trident submarine the Trident missile the M-1 tank the MX missile Why were these weapons built Why are they so expensive Why dont they work as promised Americans are generally aware that a huge problem exists in the ways and means of defense procurement. What few understand, however, is the actual process of buying a weapon. Unguided Missiles is the fullest and best description of this process yet published, from milestone zero, the determination of need, to actual production of the piece of hardware. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
